

PET INSURANCE PLANS

Prepare for the unexpected. Pet insurance provides you the peace of mind and confidence to make better healthcare decisions in the best interest of your pet. Veterinary medicine is increasingly employing more advanced medical techniques – the options for diagnostic testing and treatment protocols is expanding seemingly on a daily basis. Due to these advancements, pet owners have higher expectations for their pet’s health care and standard of living. As such, the cost of pet care and the market for pet insurance has increased.

Many companies offer the ability to customize your coverage and tailor a plan that best fits your and your pet’s needs. Pet insurance ranges from about \$30-100/month depending on your coverage plan but can cover up to 90% of vet bills! Most pet insurance companies will not cover pre-existing conditions, for this reason, we recommend signing up while your pet is young and healthy.

BELOW ARE SOME OF THE MORE POPULAR PLANS AMONGST OUR CLIENTELE
